

BVC for SCM Routech Call us today, we can help!

Route into your rubber tops? No problem. BVC rubber tops with incorporated groove can accept foam gasket to make a new seal.

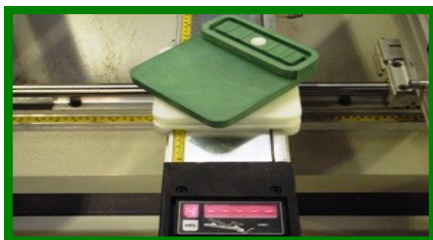

BVC rubber tops are also sectional, 2" parts are no problem on our 6" cup. Just use gasket material. Cups are also available in half and quarter size (as seen in photos below).

Flexibility? You got it, BVC cups rotate every 15 degrees. Cup comes complete, includes base, cup, bottom gasket, ball valve and top gasket.

Replaceable parts available.

Save your tooling, BVC has no metal parts to route into.

No more turning cups on/ off with the flip button, BVC manufactures our own one piece ball valve. Ball valve is only open when material is present.
